The Campus-wide Recycling Program has not been a great success, as we have discovered through recent analysis from class projects. As an institution we still have much room for improvement, and the Council feels that we should address each identified inconsistency as rapidly as possible and publicize our progress. Primarily, there is a problem getting recycling from the drop-off containers into the bin for shipment to our contractors. Additionally, bin placement needs to be improved, including pairing recycling and waste bins so that consumers have complete options. Recycling bins need to be located outside of buildings, paired with existing waste bins. It is very important that we obtain and publish recycling results to the campus community. The Council encourages widespread marketing of recycling information. We recommend building additional momentum for a Universal Waste Management plan, which would include procedures to properly dispose or recycle lighting ballasts, batteries, waste oil, electronics, printer/copier cartridges, and more.
